PROFILE SUMMARY

Full-Stack Product Engineer with 8+ years shipping products across fintech, insurance and healthcare, from product design and UX to backend, cloud infrastructure and production AI. Focused on LLM-powered applications, AI agents, RAG and event-driven systems. Owns architecture and works directly with founders and clients to take products from idea to launch.

SKILLS

Technical Leadership: Architecture & stack ownership, mentoring, hiring, working with founders & clients

AI Products & Agents: LLMs (OpenAI, Anthropic), RAG, Tool Calling, MCP, Multi-Agent Workflows

Agentic Engineering: Running parallel teams of AI agents (Claude Code, Codex), Claude Design, Linear

Web & Mobile Apps: TypeScript, React, Next.js, React Native, Node.js

Backend & Architecture: Rust, Microservices, Event-driven (Kafka), GraphQL, HIPAA-compliant systems

DevOps & Cloud Infra: AWS, GCP, Docker, Kubernetes, Terraform, CI/CD, Monitoring

Data: PostgreSQL, MongoDB, Elasticsearch, Vector DBs

Automation: n8n, Zapier, Make, AI agent pipelines, Cron & queues

WORK EXPERIENCE

Product Engineer Jul 2026 - Present

Waterlily - San Francisco, USA

- Worked across all areas of the long-term care (LTC) planning product in Node.js, TypeScript and React, spanning frontend, backend, infra and HIPAA-compliant health data.
- Worked on Waterlily's proprietary LTC modeling and LLM-powered care-planning engine, turning each client's own data into personalised care plans and cost estimates.
- Designed the complete product workflows and the Waterlily design system in Claude Design.
- Released two crucial pilots with two of the largest insurance carriers in the US, including the carrier integrations behind them.

Founder (Side Project) Apr 2026 - Present

Withlove.so - AI Agent Platform

- Built a RAG pipeline that learns each user's tone, language mix, signature phrases and boundaries from 90 days of their Instagram captions, DMs and comment replies.
- Shipped agentic booking and payment flows: the agent reads Google Calendar, holds slots, takes payment in chat and confirms back to the user.
- Instagram DM auto-replies in the user's voice, with high-intent messages routed to the human.

Senior Full Stack / Backend Engineer Mar 2024 - Apr 2026

Emirates NBD - Dubai, UAE

- Architected real-time payment tracking on AWS Lambda and Kafka for high-volume transactions, improving traceability and cutting settlement delays.
- Built the Statement Manager module for the Business Online app, giving enterprise clients secure on-demand account, credit card, loan and FD statements.
- Engineered a polyglot Rust and Node.js document engine with 10x faster statement generation than the legacy system, within regulatory compliance.

Full Stack Engineer Dec 2021 - Dec 2023

Noumena - Miami, USA

- Built backend services for a professional social network and financial support platform for freelancers, enabling them to network, hire teams, and fund or buy ideas.
- Designed 12 Node.js microservices with Domain-Driven Design behind an Apollo Federation gateway, with zero dropped messages at ~50ms latency.
- Developed AI-powered analytics pipelines (LangChain) to extract behavioural and financial insights from transactional data.
- Contributed to blockchain-integrated workflows, including smart contract interactions and decentralised data flows.

Full Stack Engineer Dec 2020 - Dec 2021

Tokopedia - Noida, India

- Built high-performance backend APIs for the mobile web Discovery platform, holding TTFB at 87ms. This work was showcased twice at Google I/O.
- Built internal admin tools for large-scale sales campaigns and dynamic content moving millions in GMV daily.

Full Stack Engineer Jan 2019 - Dec 2020

To The New - Noida, India

- Led the API rebuild for Kokaihop 3.0, supporting 2,000 concurrent users with Elasticsearch, RabbitMQ and Node cluster mode.
- Improved real-time search performance by integrating Elasticsearch, reducing query latency by ~20%.
- Built Bharti AXA's offline-first insurance PWA with a multi-level form wizard and Redux state.

EDUCATION

B.Tech in Computer Science and Engineering,
APJ Abdul Kalam Technical University
